

GDPRESS fittings offer reliable and consistent performance, combined with an easy installation process using common M-contour design and tooling compatability.

This fitting doesn't contain any seals as per the majority of the Press Fit range - The main use of this fitting is to slot into a Female Press Fit end to then make this end Male BSP. Once slotted into the female end it is then crimped down into place as with the other fittings in this range using a REMS crimping tool.

All fittings are made from 316L (1.4404)
WRAS approved

Optional Fluoropolymer (FPM) O-rings are also available which offer higher heat and chemical resistance
